

Our B&S Salt Lick Sleds and Mineral Feeders are built for durability, convenience, and real ranch use. Each unit is fully welded, capped, and mounted on a heavy-duty sled base so they can be moved easily when rotating pastures or adjusting feeding areas.

Unlike lightweight store-bought options that tip over or get dragged across the pasture, these sled systems are designed to stay upright and stay where you put them. No more chasing tubs across 30 acres or finding spilled mineral after bulls knock them over.

The sled design also makes them safer and easier to move, whether you're pulling them with a tractor, ATV, or letting the kids help around the ranch.

Available Options Salt & Mineral Sleds •2-Block Salt Lick Sled – \$300 •Dual Salt+ Single Tall Mineral Sled – \$500 •Single Mineral (Short Version) – \$500 •Dual Mineral Tub Sled – \$800 Mineral Feeder Options

•Adjustable heights available to match livestock size

•Keeps mineral higher and away from calves, lambs, and smaller animals

•Poly Plastic One-Piece Bottom Upgrade – \$250

•Traditional wood bottom option available for a classic ranch style

Why Ranchers Like Them •Heavy-duty welded construction •All pipe ends capped for safety •Sled base makes moving between pastures easy

•Prevents tubs from tipping or being dragged off •Keeps mineral

accessible to the right livestock •Built to last for years of use built in

Oklahoma by ranchers who use this equipment every day.
